

MISTING SYSTEM CONCENTRATE MSC

Insect Control Solution for your Irrigation System

NATURE'S DEFENDER CEDAR OIL FORMULATION is instrumental in control of Head lice, Mosquitoes, Flies, Fleas, No-See-Um, Chiggers, Ticks, Chinch Bugs, Grub Worms, Mites, Mole Crickets, Earwigs, Slugs, Snails, Caterpillars, Beetles, June Bugs, May Bugs, Root Maggots, Army Worms, Weevils, Wire Worms, Ants and Termites

MSC is a specially designed and internally modified Cedar Oil formulation created for delivery as an insect control solution in LAWN MISTING SYSTEMS and VECTORGATION technology. It is 100% miscible in water and leaves a ZERO NO STAIN residual on plant life, concrete, stone and wood structure when delivered through misting nozzles or irrigation sprinkler heads. MSC's high carbon content increases microbial activity in the plant life and soil rather than destroying it. MSC has no effect on Sight Driven Beneficial Insects such as Lady Bugs, Butterflies and Amphibians such as Frogs and Toads. MSC is a repellent and an insect killer. The aroma of Cedar Oil impairs the mental capacity of non beneficial insects affecting their pheromone instincts that guide them to all matters, for example human. The Cedar aroma triggers the exodus of the insect and if departure is not immediate, the insect becomes overwhelmed and will succumb. Departure of the insect interrupts the egg layer cycle and expels the next generation of pest. The Aroma of Cedar Oil provides a barrier of re-entry by masking the Keremone of all matters in the treated area. Heat Seeking and Pheromone driven VENOMOUS SNAKES are deterred by MSC and will evacuate and avoid treated areas. MSC is a concentrate and is sold in gallon containers.

Active Ingredients: Cedar Oil. 85%

Inert Ingredients: Ethyl Lactate. . . .15%

EPA REG. #6423-25B-1
